Paris Road Corridor Streetscape Enhancement: This project was included in the Coastal Strategy Document In order to promote ecotourism in St. Bernard Parish by accentuating the natural environment along Paris Road; and

Lake Lery Marsh Creation (Phase 2): This approximately 40-acre marsh creation and nourishment project has already been designed and permitted, but is currently lacking construction funding. St. Bernard Parish Bikeway and Pedestrian Plan Update (2017)

The purpose of this document is to provide a parish-wide network for non-motorized travel that links local destinations, communities within St. Bernard Parish, and the Parish with neighboring Orleans and Plaquemines parishes. A major feature of the plan is a regional network that takes advantage of St. Bernard's unique geography by providing trails along the levee system.

Central Wetlands Unit Bike Path: The purpose of this proposed project is to construct a portion of the regional trail network. The project includes engineering/design and construction of a 6 ft. wide limestone screenings path on top of the back levee for a distance of approximately one mile. This segment begins at Paris Road (LA 47) and extends eastward to Val Riess Park, one of two major SBPG regional parks.

6. If applicable, describe the amount and current status of funding from other sources (e.g., other RESTORE Act contribution, other third party contribution) and provide a description of the specific portion of the project to be funded by the RESTORE Act Direct Component.

St. Bernard Parish intends to use RESTORE Act Direct Component funding for the Lake Lery Marsh Creation (Phase 2) as a cost share match to the available funding from the Louisiana Coastal Protection and Restoration Authority (CPRA), under Spill Impact Component. The total estimated cost for the project is \$3,009,000.00 for 100% construction and grant administration. Direct component funding of \$309,000 will go towards 10% construction and grant administration and the CPRA Match \$2.7M will cover the remaining 90% of construction cost. The parish is awaiting the award from CPRA.
