**Article I – In General**  
**Section 4-8 – Backyard Hens**

**Section 4-8.1. Definitions**

*Animal Housing Enclosure* means any structure or other enclosure contained within the owner's property limits and designed, adapted, or used to segregate an animal to a smaller area or restrict an animal to a limited space, including, but not limited to, pens, cages, hutches, coops, and fenced portions of a yard or property. This term does not include the term *shelter* as defined in this section.

*Basic Grooming* means maintaining the eyes, ears, beaks, feet, nails, coat, and skin of an animal in such a manner that is reasonably necessary for the health and safety of the animal.

*Chicken coop* means a covered, predator-resistant chicken house that is designed to be easily accessed, cleaned, and maintained, and meets all the specifications for a shelter, animal housing enclosure, and any other applicable requirements of this Chapter.

*Exercise yard* means an enclosure attached to a chicken coop that provides exercise for backyard chickens and is constructed to prevent the backyard chickens from escaping such enclosure and offers protection from predators.

*Nesting box* is a clean, dry, enclosed area in a coop designed to facilitate egg laying that is large enough to allow each hen being kept to sit, stand up, and turn around easily, with sufficient bedding material or nest pads to reduce egg breakage during laying.

*Roosting Space* means a perching area made of non-metallic material that is elevated above the floor level of the nesting box(es), located so that all housed chickens can sit, stand up, and turn around without coming into contact with a wall, the ceiling, or a perch above it, and staggered so that no roosting space is directly above or below it.
